Learn & Explore ATSC 3.0

In addition to standard PCAP playback and record, **RZCAP** playback and record is a unique feature designed exclusively for TvXplorer, capturing all the signal properties recorded every 5 seconds including SNR, RSSI, baseband, LMT% and dozens more. This ensures your playback mirrors what you see in a live TV feed.

Computer Requirements

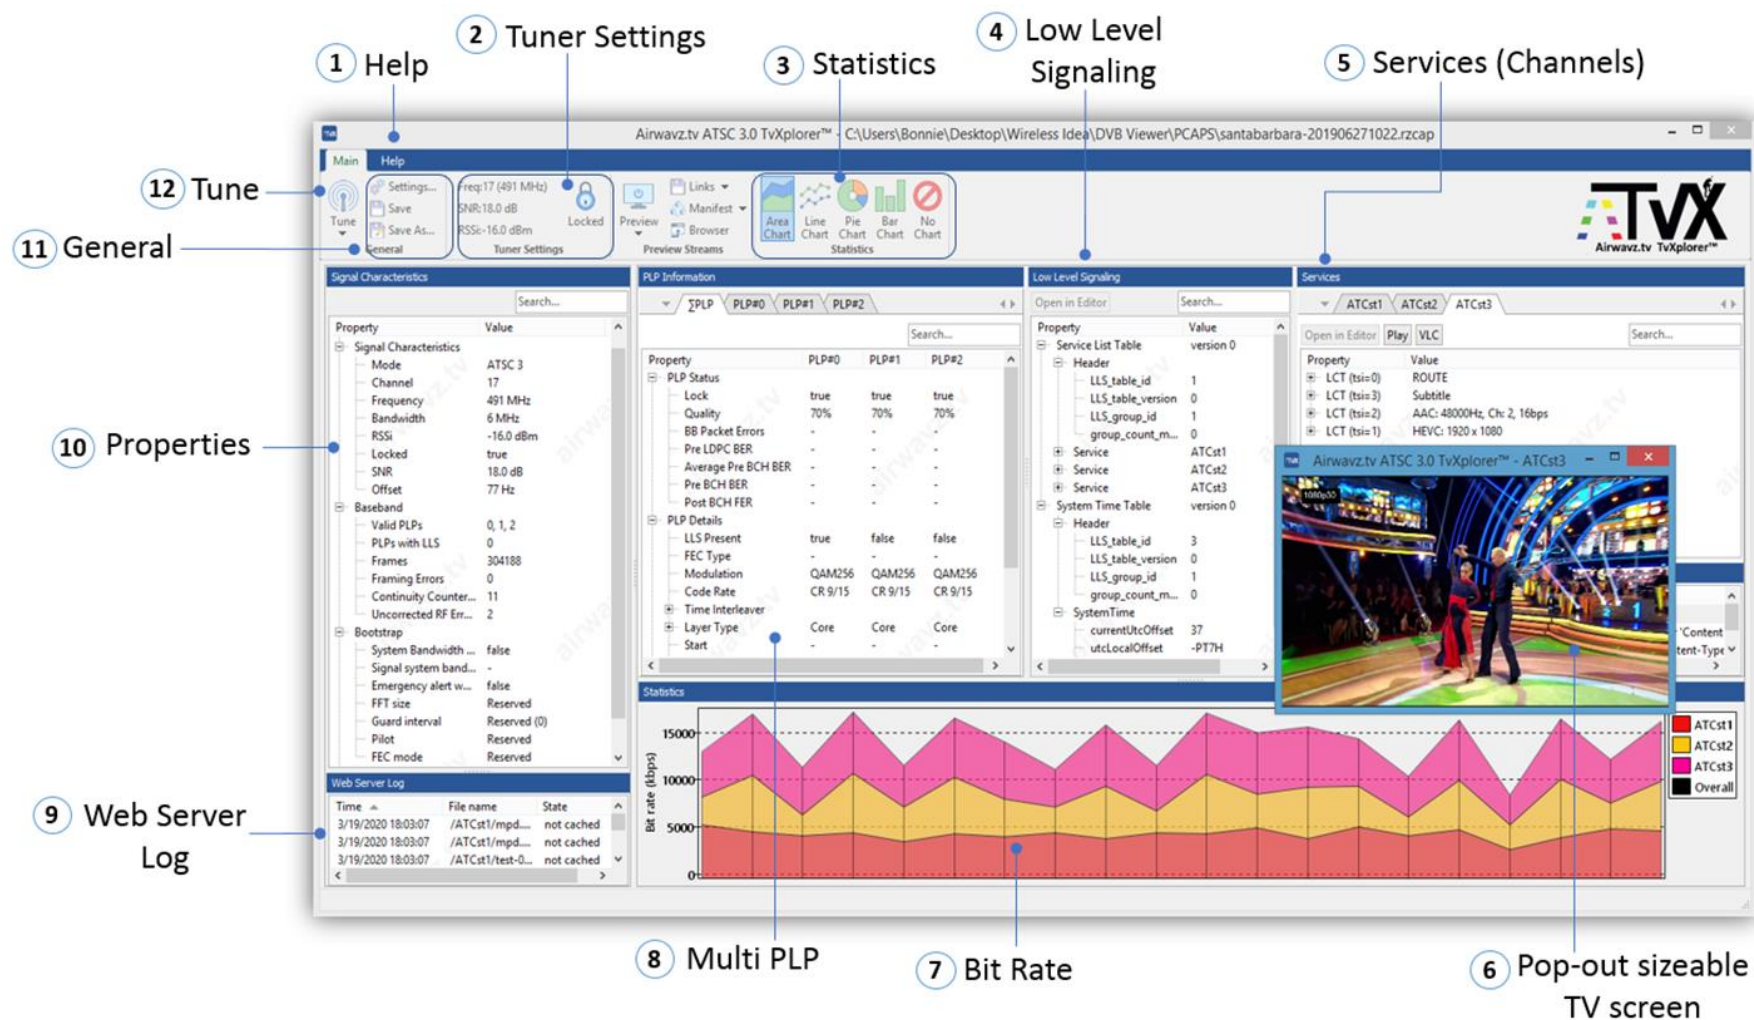

- 64-bit Microsoft® windows 10x OS
- H.265 decoding
- 8 GB RAM
- 1 GB free disk space
- Sixth-generation or later dual-core or quad-core intel® i5, i7 CPU

For NextGen TV Trials, Deployments & Testing

TvXplorer™ Suite is exactly what you need to test NextGen TV fast and effectively. TvXplorer Suite combines professional test and measurement software with ATSC 3.0 television receivers that go with you on the road (or the boardroom) and won't break your budget.
